

Needfinding

1. Needs to provide more clarity on how to use it
2. Needs to have some sort of indication on what can and can't be scanned
3. Needs to have a brief preliminary tutorial for first-time users
4. Needs to have more accuracy in the recognition software
5. Needs to have a more colorful and appealing interface
6. Needs to have information that goes beyond what an average person already knows
7. Needs to find a way to be applicable to the general public, as it would currently appeal more to children or someone learning the language
8. Needs to be able to scan more than everyday objects
9. Needs to incorporate another layer in which something can be done with the information that is accessed
10. Needs to be able to save the scans or searches
